

FREE RESOURCE · WORKSHEET

Mosquito & Vector Control Checklist

For Caribbean hospitality environmental health

Inspect common breeding and entry conditions around accommodation, grounds, drainage and service areas, then assign action.

WHAT'S INSIDE

A practical working resource · Clear ownership and evidence fields · Follow-up and verification

How to use this resource

1 Confirm what applies

Use current requirements and technical limits from the competent authority, licence, approved procedure or qualified specialist.

2 Set the operating rhythm

Define where the check happens, how often it is needed and who owns it.

3 Record exceptions clearly

A failed or unusual result should trigger a visible action rather than disappear inside a log.

4 Keep the evidence

Link supporting reports, photographs, contractor records, rechecks or authority correspondence.

5 Verify closure

Do not treat an issue as complete until the control has been restored or the next step has been formally accepted.

IMPORTANT

Environmental-health requirements, thresholds and reporting duties vary by jurisdiction.
Follow current instructions from the competent authority and qualified professionals.

Mosquito & Vector Control Checklist

Inspect common breeding and entry conditions around accommodation, grounds, drainage and service areas, then assign action.

Standing water around grounds

Blocked drains / gutters

Plant saucers / decorative containers

Waste / discarded containers

Pool / water-feature concern

Screens / doors / entry points

Guest-room / balcony issue

Back-of-house breeding point

Contractor treatment due / completed

Staff report / guest report trend

Corrective action

Owner / due date

Recheck / closure

A completed form is not the control. The follow-through is.

CaribSafe helps hospitality teams connect routine checks, exceptions, corrective actions and evidence so environmental-health work stays visible between inspections and incidents.
